Prirodno odvođenje dima, od pionira ove tehnologije.

Firma SIMON PROtec Systems GmbH sa sjedištem u Passau nudi preko 50 godina pogonsku i upravljačku tehnologiju za prirodno odvođenje dima i topline. „Created in Bavaria“ je ključna riječ za razvoj i proizvodnju. SIMON PROtec isporučuje širok asortiman provjerenih kompaktnih i modularnih centrala po cijelom svijetu. Preko 20 godina nudimo i tekstilnu protupožarnu zaštitu u obliku automatskih protudimnih i protupožarnih zavjesa. Izolacija u slučaju požara, odvajanje dimnog dijela i odvođenje dima i topline – SIMON PROtec je tu za mnoge varijante moderne protupožarne zaštite.

U cijelokupnom ciklusu gradnje, stojimo Vam na raspolaganju za savjetovanje i pomoć.

SIMON PROtec – we create fire safety!

Natural smoke ventilation from the pioneer of this technology. The company SIMON PROtec Systems GmbH with headquarters in Passau, Germany, offers actuators and control panels for natural smoke and heat exhaust ventilation for nearly 50 years. „Created in Bavaria“ is the slogan for the development and production in-house. SIMON PROtec provides a wide range of approved actuators and compact/modular control panels worldwide. For more than 20 years we are also active in the field of textile smoke and fire curtains. Fire protection bulkhead, smoke area separation and smoke and heat exhaust - SIMON PROtec stands for multi-variant systems for modern fire protection. During the whole construction cycle we can assist and advise you.

SIMON PROtec - we create fire safety!

Opis simbola

Symbol description

RWA korištenje
Upotrebljivo za prirodno odvođenje
dima u zgradama

Smoke vent approved
Usable for natural smoke
ventilation in buildings.

Prirodna ventilacija
Ispitana izdržljivost za
dnevnu ventilaciju

Natural Ventilation
Approved for reliability. Usable
for daily open and close.

Eko struja
Proizvodi od 100% eko struje

Green energy
Products manufactured with
100% green electricity.

24 V DC Verzija
Postoje pogonske varijante za
24 V DC opskrbu

24 V DC version
The actuator is available with a
connection for 24 V DC supply.

NRWG testirano
Kompletan sistem je testiran
prema DIN EN 12101-2

NSHEV approved
The smoke ventilator is appro-
ved according EN 12101-2

Snaga
Visoka učinkovitost i
maksimalna snaga

Powerful
Very high efficiency and
maximum force

230 V AC Verzija
Postoje pogonske varijante za
230 V AC pogon ventilacije

230 V AC version
The actuator is available for
230 V AC daily ventilation usage.

Tandem varijanta
Sigurnosno gašenje zbog
preopterećenja kod npr. blokade

Tandem version
Safety cut-off at overload
through for e.g. blockade

Sinkronizirano upravljanje
Medusobna kontrola kroz
podešavanje brzine

Synchro control
One another controls the drive
speed.

SICO
Pogon ima BUS programsko sučelje

SICO
The actuator has a BUS
connection for programming.

Simon Link
Pogon ima priključak za
programiranje

Simon Link
The actuator has a connecti-
on for programming.

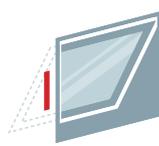

Različite varijante ugradnje

Pomoću crvenih crta objašnjene su
mogućnosti otvaranja i mogućnosti
ugradnje na prozore.
(desno je nekoliko primjera)
Primjeri ugradnje u obliku tehničkih
detalja napravljene su sa okvirom
(=SIVA boja) i krilima (=CRVENA boja)

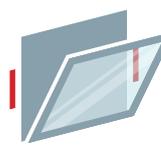

Prozor prema van
Pogon dolje na sredinu okvira

Top hung window outward
opening. Actuator bottom
middle at the frame.

Prozor prema van
Pogoni sa strane na okvir

Top hung window outward
opening. Actuators sideways
at the frame.

Prozor prema unutra
Pogoni sa strane na okvir

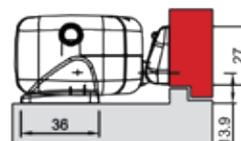

Bottom hung window
inward opening. Actuators
sideways at the frame.

Installation ways

Through red position blocks you see the
possible opening directions and installation
positions of actuators at the windows.
(find right some examples)

Installation examples will be shown as
technical deatils with frame (= color GREY)
and sash (= color RED).

Usluga premazivanja

Aluminijski pogoni i uz to pripadajući setovi konzola mogu se u bilo koju RAL i DB boju lakirati. Rado prilagođavamo boju prema vašim uzorcima, odnosno željama.

Coating service

Aluminium actuators and the associated bracket sets can be coated individually in all RAL or DB colors, whether wet painted or powder coated. We adjust ourselves according to your painted examples.

CAD detaljno planiranje

Za sve pogonske jedinice postoje individualno pripremljeni CAD crteži koji se mogu integrirati u vaše planiranje. Dodatno nudimo servis, SIMON PROtec pogonsku tehnologiju, prilagoditi vašim nacrtima.

CAD detailed planning

For all actuator and locking mechanism systems exist individual made CAD drawing kits, which you can integrate into your plans. Additionally we offer the service to set SIMON PROtec actuators into your finished drawings.

Dokumenti online

Dokumentacija od proizvoda, kao npr. upute za uporabu, tehnički detalji, CAD crteži i certifikati, dostupni su na web stranici: www.simon-protec.de

Documents online

Detailed product documents like user manuals, technical details, CAD drawings and certificates are available for download on our website: www.simon-protec.com

SIMON Kalkulator

Naš kalkulator vam pomaže u izračunavanju različitih parametara za vaš prozor, npr. aerodinamički protok i područje otvora, potrebnu snagu pogona i duljinu hoda. Možete napraviti odgovarajuće pogone za različite situacije ugradnje i kao registrirani korisnik, svoje rezultate možete spremiti.

SIMON Calculator

Our product calculator supports you in the mathematical calculation of various parameters for your window, e.g. aerodynamic flow value and opening area, necessary actuator force and stroke. You can determine suitable actuators for different installation situations and save your results as a registered user.

Oznake proizvoda

Pogonska i tehnologija okova od SIMON PROtec-a opisana je kako slijedi:

Primjer: PA-KL²-50/710-S

PA	Plug&Play
KL ²	Serija sa preklopnom rukom
50	Snaga 500 N
/	Varijanta odvajanja
710	Hod 710 mm
S	Sinkronizirani pogon

Primjer: EA-K-30/600-T-DA

EA	Električni pogon
K	Serija lančani pogon
30	Snaga 300 N
/	Varijanta odvajanja
600	Hod 600 mm
T	Tandem
DA	Dupli priključak

Product description

Actuators and locking mechanisms will be described as followed:

Example: PA-KL²-50/710-S

<i>PA</i>	<i>Plugged actuator</i>
<i>KL²</i>	<i>Series folding arm² actuators</i>
<i>50</i>	<i>Force 500 N</i>
<i>/</i>	<i>Variant separator</i>
<i>710</i>	<i>Stroke 710 mm</i>
<i>S</i>	<i>synchronous actuator</i>

Example: EA-K-30/600-T-DA

<i>EA</i>	<i>Electrical actuator</i>
<i>K</i>	<i>Series chain actuators</i>
<i>30</i>	<i>Force 300 N</i>
<i>/</i>	<i>Variant separator</i>
<i>600</i>	<i>Stroke 600 mm</i>
<i>T</i>	<i>Tandem</i>
<i>DA</i>	<i>Double connection</i>

SICO

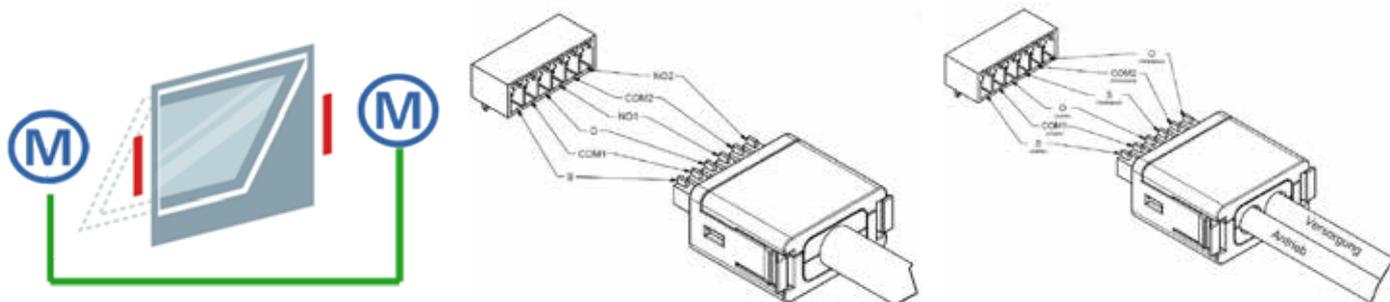

SICO

SICO Tehnologija (SIMON Connect & Communication) ujedanjuje tehnologiju polariteta i moderno BUS upravljanje procesima za pogone i upravljačke sisteme budućnosti.

SICO technology (SIMON Connect & Communication) combines proven pole reversing technology and modern BUS controlled processes for the actuators and control systems of the future.

SICO BUS tehnologija dozvoljava novu razinu komunikacije u pogonskoj i upravljačkoj tehnologiji. SICO BUS Sistem omogućuje umrežavanje različitih dijelova međusobno do tehnologije upravljanja zgradama. RWA- i upravljanje ventilacijom komuniciraju direktno sa pogonom. U hitnim slučajevima, izmjena polova će i dalje biti prioritet.

The SICO BUS technology allows a new level of communication in the actuator and control technology. The SICO BUS system enables the networking of different facility components with each other up to the building control system. SHEV and ventilation control systems communicate directly with the actuators for daily use. In case of emergency the pole switching technology will still have the highest priority.

Savršeno sinkronizirano *Perfectly synchronous*

SICO je pojam za funkcije i prilagođavanje na nove i postojeće pogonske sisteme. Sa imenom PA (Plugged Actuator) umjesto EA, korisnik odmah prepoznaje SICO pogone. RWA pogoni su prema DIN EN 12101-2 u kombinaciji sa različitim profilima testirani i mogu se koristiti za kontroliranu prirodnu ventilaciju kao i za odvod dima. Sinkronizirani PA-pogoni komuniciraju preko BUS-a unutar pogonske grupe i reguliraju međusobno redosljed (Master-Slave Funktion), što rezultira savršenom sinkronizacijom.

SICO is the overall term for a number of functions and adaptations to new as well as known actuator systems. With the product name PA (Plugged Actuator) instead of EA the user immediately recognizes SICO capable actuators. The SHEV-capable actuators are tested according to EN 12101-2 in connection with different profiles and can be used for controlled natural ventilation as well as for smoke ventilation. Synchronized PA actuators communicate via BUS within the actuator group and control each other's running behaviour (Master-slave function). This is „real“ synchronization.

SICO PLUG utikač
SICO PLUG connection cable

SICO PLUG utikač

Uključuje SICO USB-110 adapterski kabel.

*Diagnostic and parameterization software for the maintenance and analysis of
SIMON PROtec products. Included is a SICO USB-110 adapter cable.*

Preklopna ruka

Stranica 12 do 19

Pogonska tehnologija sa snagom i estetikom: Premium RWA pogon sa preklopnom rukom je izvrstan inovativan razvoj SIMON PROtec-a.

Pogoni serije sa preklopnom rukom imaju otvaranje, koje je jedinstveno na tržištu. Uvjerite se u njegove mnoge načine primjene.

12 PA-KL²

Inovativna pogonska tehnologija sa SICO BUS tehnologijom za savršenu sinkronizaciju pogona. „Plug&Play“ (PA) preklopna ruka snažan je pogon i sa svojim lijepim dizajnom idealan je za projekte sa visokim estetskim zahtjevima – pogotovo za velike i teške prozore.

16 PA-KL²-DF

Čvrsto na okviru ili na prozoru montiran, PA-KL-DF otvara i zatvara prozore na kip i zaokretne prozore, pomoću specijalne klizne konzole, zbog koje su moguće velike širine otvaranja, preko 140°.

Innovative folding arm² actuator technology with SICO BUS technology for perfect synchronization between individual actuators. The „plugged actuator“ (PA) folding arm² is a very powerful actuator and with its stylish design ideal for projects with high aesthetic demands - especially for large and heavy windows.

Fixed to the sash or the frame the PA-KL²-DF opens and closes tilt and turn and top hung windows through a special sliding track. So very wide opening angles over 140° are possible.

Folding Arm²

Pages 12 to 19

Actuator technology with power and style: The premium smoke vent actuator Folding Arm² is an extraordinary and innovative development of SIMON PROtec. Actuators

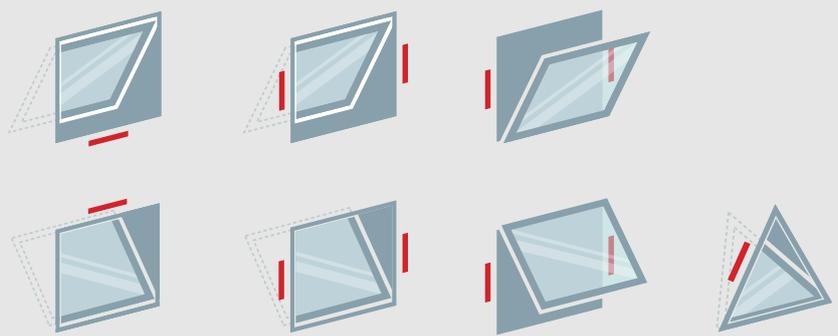

of the Folding Arm² series have an opening kinematics which is unique in the market. Convince yourself about many different applications.

18 PA-KL²-T

Ova specijalna verzija sa preklapnom rukom je koncipirana za uporabu kod vrata. Montira se na okvir vrata i u slučaju nužde PA-KL-T otvara evakuacijske izlaze i ventilacijske otvore.

This special version of the Folding Arm² is made for the usage in doors. Set either on the frame or in the reveal the PA-KL²-T opens in case of a fire and shows the escape routes and provides fresh air.

PA-KL pogoni imaju standardnu zaštitu IP 54, ali mogu prema želji kupca imati i certificiranu zaštitu IP 65. Pogoni sa preklopnom rukom sa zaštitom IP 65 imaju fiksni kabel.

PA-KL² actuators have an IP 54 protection class as standard, but can also be supplied with IP 65 certification on customer request. The Folding Arm² actuators with IP 65 protection have a fixed connecting cable.

Preklopna ruka² PA-KL²

Folding Arm² PA-KL²

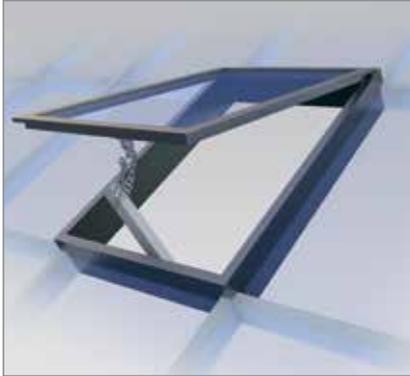

PA – Plug&Play sa inovativnom SICO BUS tehnologijom za savršene sinkronizacije među pogonima. PA-KL je snažan pogon sa preklopnom rukom i sa svojim lijepim dizajnom idealan je za projekte sa visokim estetskim zahtjevima – pogotovo za velike i teške prozore.

PA - Plugged Actuator with innovative SICO BUS technology for perfect synchronization between individual actuators. The PA-KL² is a very powerful folding arm² actuator and with its elegant design ideal for projects with high aesthetic demands - especially for large and heavy windows.

Prednosti / karakteristike

Advantages / performance characteristics

- Minimalna dubina ugradnje
Smallest installation depth without competition
- Otvaranje unutar 60 sekundi
Opening time within 60 seconds

Ugradnja

Installation way

EA-KN-20-XS ugrađuje se direktno u profil prozora. Potreban prostor za ugradnju se treba napraviti u procesu proizvodnje prozora.

The EA-KN-20-XS will be set directly into the window profile. The required space shall be provided during the manufacturing of the window itself. Necessary .dwg files are available.

Linearni pogoni

Stranica 36 do 51

Linearni pogoni od SIMON PROtec-a su opremljeni sa svim karakteristikama, koji se očekuju od modernih pogona, sa niskom potrošnjom energije i učinkovitom upotrebom energije. Pogoni rade tiho i prikladni su također za velike prozore.

36 EA-L / EA-L-LF

Vizualno privlačan u uskom profilu cilindra, EA-L sa niskom razinom buke, ostvaruje do 1000 N snage kod hoda dužine 1000 mm.

Good-looking in a small cylinder profile the EA-L performs nearly soundless up to 1000 N force at 1000 mm stroke.

42 EA-L/S / EA-L/S-A

Patentirana pogonska kinematika otvara velike prozore, koji se otvaraju i prema unutra i prema van.

Patent protected actuator kinematics provides huge opening angles for inward and outward opening windows.

40 PA-L-180

Linearni pogon služi za velika opterećenja do 1800 N po pogonu i 4 komada u sinkroniziranom radu.

The heavy load spindle actuator is made for heavy loads up to 1800 N per actuator and four units in synchronous operation.

44 EA-SZ

EA-SZ zupčasti pogon napravljen je za industriju, s maksimalnom učinkovitošću.

The EA-SZ rack and pinion actuator is made for industrial applications with a maximum efficiency.

Linear actuators

Pages 36 to 51

The linear actuators from SIMON PROtec are equipped with all characteristics that can be expected of modern actuators and shine with low current consumption and an effecti-

ve power utilization. These actuators are quiet in operation and are ideal for applications with heavy duty windows or large skylights.

46 EA-L/S-1000/48

48 EA-L 120 / EA-L 165

Ove dvije vrste pogona idealni su za automatsko otvaranje i zatvaranje prozora s lamelama.

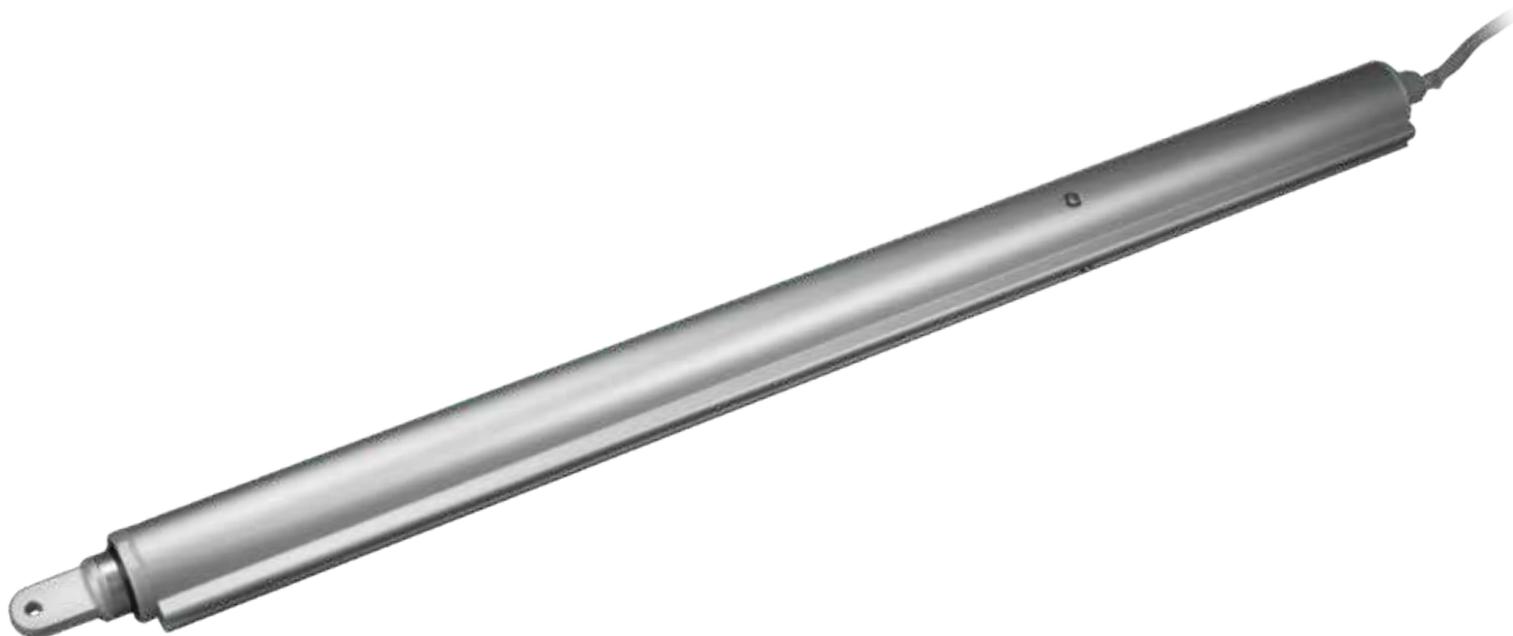

Both types of actuators are the ideal solution for automatic open and close of louvre windows.

50 SHEV-FLAP

Vremenski uvjeti ne utječu na odvod dima.

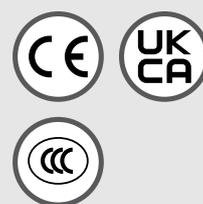

Wind direction-independent weather-protected smoke extraction system for elevator shafts and smoke shafts.

Linearni pogon EA-L

Linear actuator EA-L

Ovaj linearni pogon nudi mnogobrojne mogućnosti primjene. U području standardnih pogona karakterizira ga nekoliko jedinstvenih karakteristika, koje linearni pogon čine što jednostavnijim za korištenje.

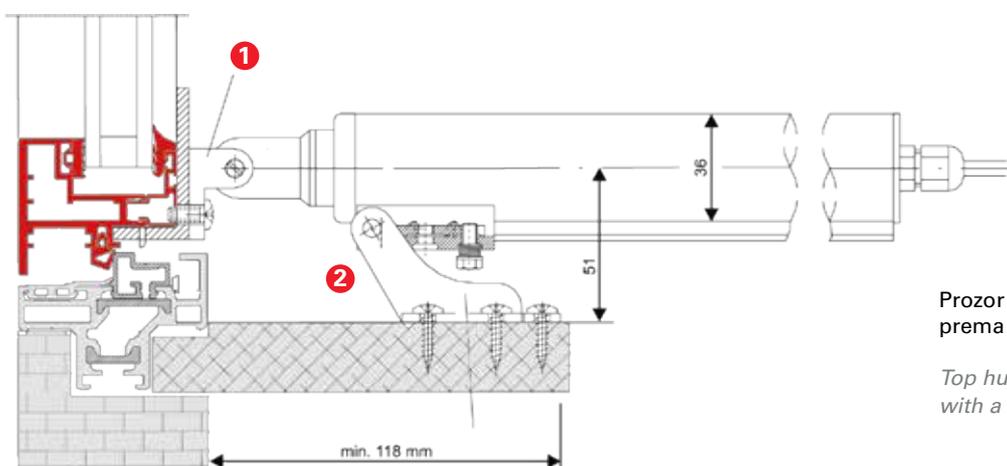

This spindle actuator offers a multitude of application options. In the range of standard actuators it is characterized by a couple of unique selling points which make application as easy as possible for you.

Prednosti / karakteristike

Advantages / performance characteristics

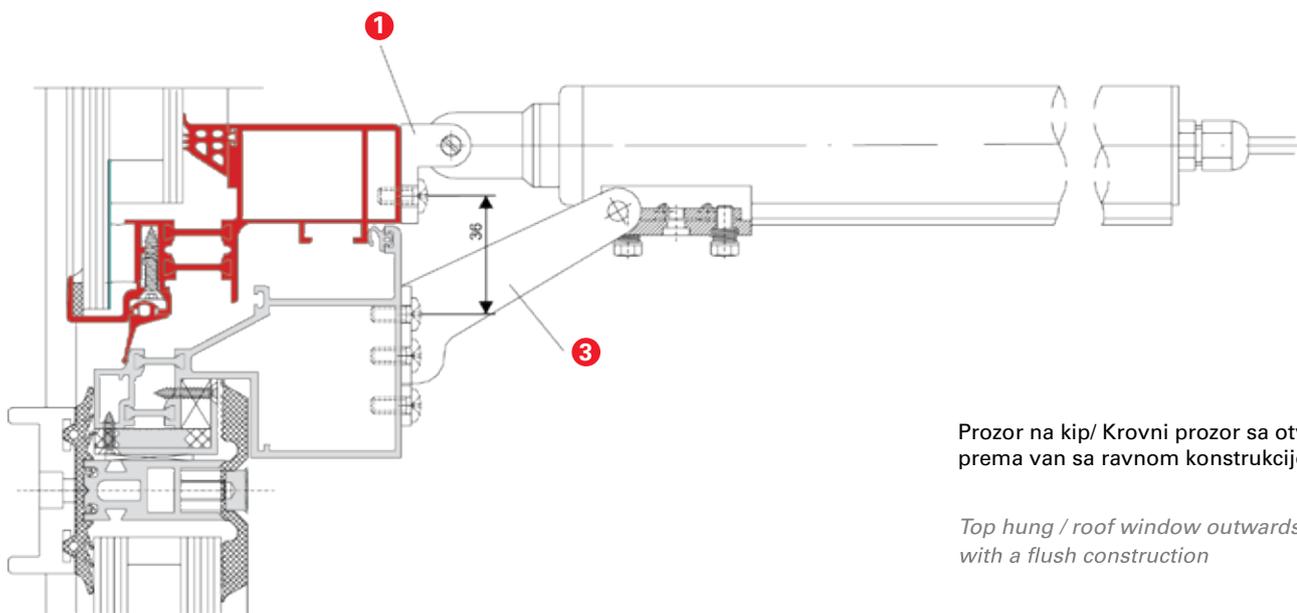

- **Maksimalna snaga unatoč maloj dimenziji**
Maximum strength despite small diameter
- **Integrirano rasterećenje**
Integrated overload cutoff
- **EA-L-30 300 N / 1000 mm ispod 60 sekundi (Simon Link)**
EA-L-30 high-speed actuator 300 N / 1000 mm under 60 seconds (Simon Link compatible)
- **Tandemske i sinkronizirane varijante (do 4 pogona) – integrirano upravljanje**
Optional tandem and synchro versions (up to four actuators) - control unit integrated
- **Fleksibilni setovi konzola**
Flexible bracket sets

Element za odvod dima SHEV-FLAP

Smoke extraction flap SHEV-FLAP

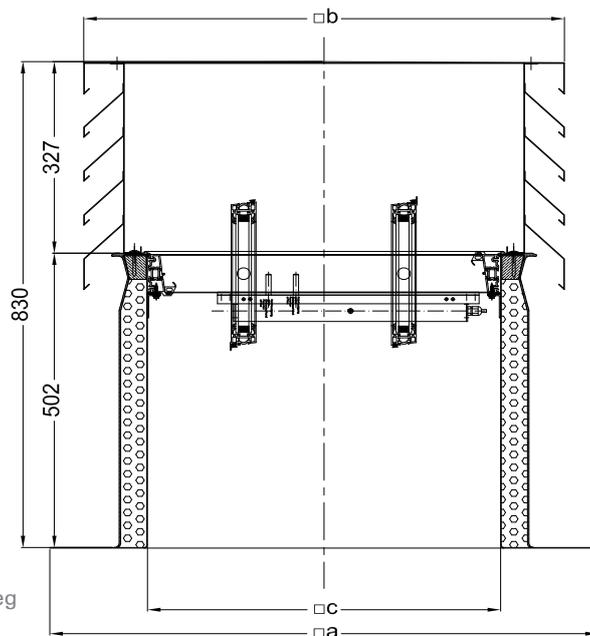

Kompaktan element za odvod dima SHEV-FLAP je element na krovu za ventilaciju odnosno odvod dima neovisno o vremenskim prilikama. Sastoji se od ravnog, toplinski izoliranog postolja GFK-a i integriranog prozora s lamelama s pričvršćenom haubom za zaštitu od vremenskih prilika. SHEV-FLAP se radi inspekcije može otvoriti i s krova.

The compact smoke extraction flap SHEV-FLAP is a flat roof system for wind and weather independent smoke and daily ventilation for smoke shafts. It contains a straight isolated GFK-curb with an integrated approved louvre window. On it there is a weather protection hood. The SHEV-FLAP is ideal for smoke ventilation openings on top of elevator or other shafts to fulfill also the energy saving ordinance.

Primjena Application

SHEV-FLAP isporučuje se kao gotovi krovni element i u pravilu ga ugrađuje krovopokrivač tokom izrade krova. Odvod dima propisan zakonom, kao i svakodnevno prozračivanje, upravlja se električnim motorom NRWG (testiran i odobren za prozore s lamelama). GFK postolje je izolirano i termički odvojeno. Lamelna hauba je opremljena sa zaštitom za ptice i prema potrebi može se staviti i zaštita od insekata. SHEV-FLAP je dostupan u 3 standardne veličine (vid tablicu). Posebne veličine dostupne su na upit.

Lamelna hauba sa zaštitom za ptice (standard)
Slatted hood with bird protection (standard)

SHEV-FLAP will be delivered as ready-to-use flat roof element and will be installed through the ordinary work of the roofers. With that element, the smoke extraction shaft will be closed on top and that closes the building surface (according energy saving ordinance). The smoke extraction required by the building code, as well as the daily ventilation of the elevator shaft, is ensured by an electric motor-driven NSHEV (tested and approved louvre window according EN 12101-2). The GFK-curb is isolated and thermally separated. The slatted hood has a bird protection grid and can be upgraded through an insect protection grid. The SHEV-FLAP is available in three standard sizes (see table). Other sizes are available on request.

Lamelna hauba sa zaštitom za insekte (opcija)
Zaštita za insekte se može izvaditi za čišćenje
Slatted hood with insects protection (optional)
Can be taken out for cleaning

Tehnologija okova

Stranica 54 do 60

SIMON PROTEC nudi pored svojih pogona također i opsežan asortiman okova. Ovi inteligentni sistemi brinu za više komfora i sigurnosti i optimalni su za različite pogonske sustave.

54 PA-ZV-UNI

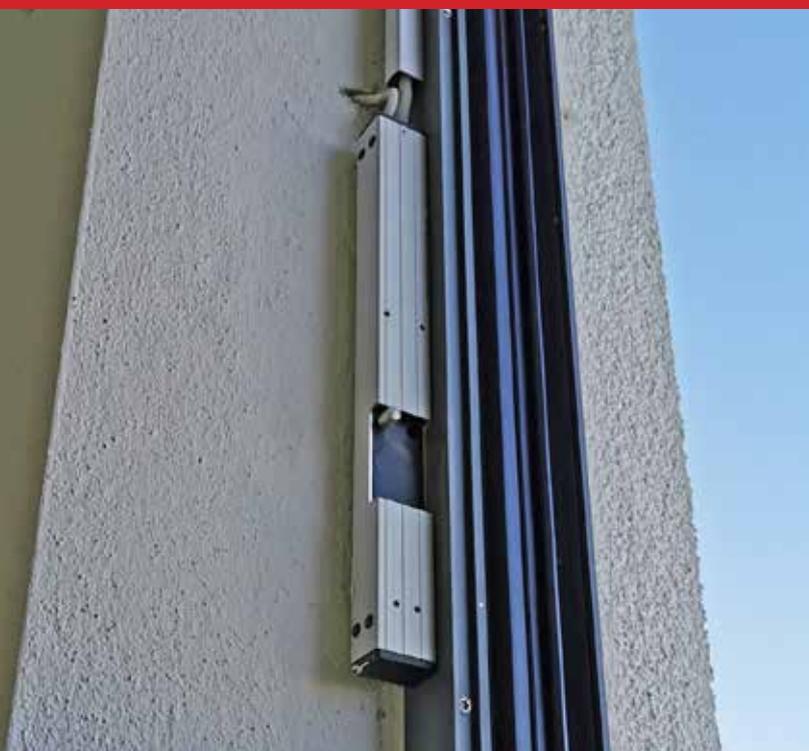

Elektroničko dodatno zaključavanje PA-ZV-UNI služi za dodatne točke zaključavanja.

The electrical supplementary locking PA-ZV-UNI will be attached on frame and provides an additional locking point.

56 ZV-ELIMATIC

Dodatni mehanizam za zatvaranje prozora koji pokreće osnovni mehanizam u samom prozoru.

This supplementary locking controls through the square bolt the integrated window locking gear.

Fitting technology

Pages 54 to 59

Besides its actuators, SIMON PROtec offers a comprehensive range of locking mechanisms. Those intelligent systems provide a

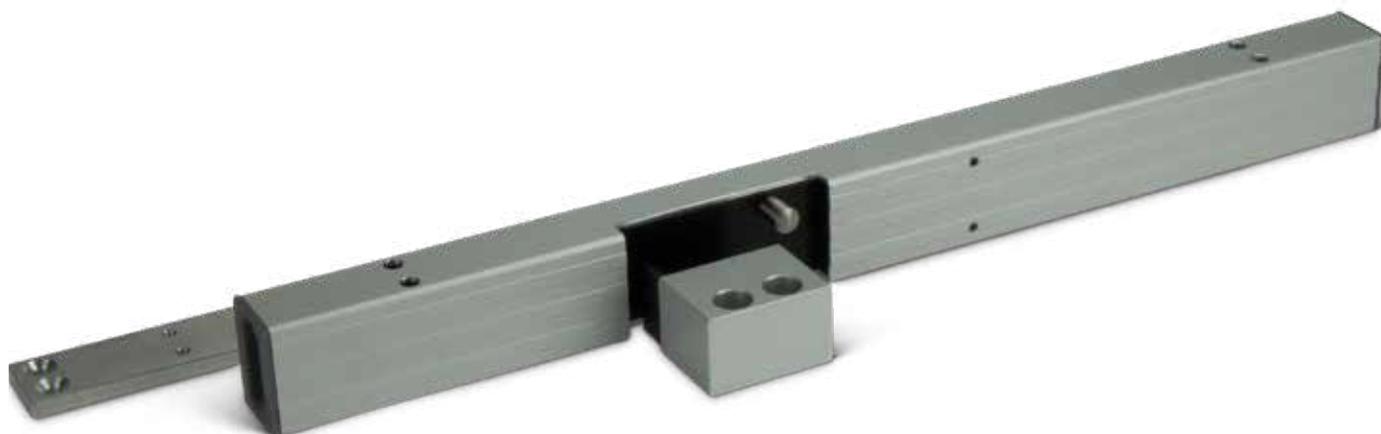

surplus of convenience and security and are specially optimized for the different SIMON PROtec actuators.

58 ZVK-LOCK

ZVK-LOCK ugrađuje se u profil prozora (ili na profil prozora) i pokreće integrirani mehanizam.

The ZVK-LOCK will be placed into the window profile (or onto it) and moves the integrated window locking stripe.

PA-ZV-UNI

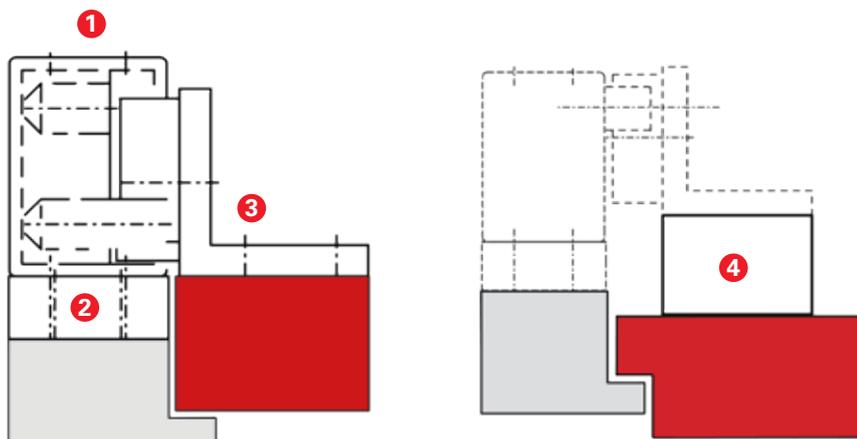

Električno dodatno zaključavanje PA-ZV-UNI sa utikačem SICO PLUG i sa kombinirajućim poklopcem za brzu instalaciju. Električno dodatno zaključavanje omogućuje povećanje pritiska kod visokih i širokih krila kroz jednu dodatnu točku zaključavanja i brine za dodatno mehaničko zaključavanje.

Supplementary Electric Locking PA-ZV-UNI with the SICO PLUG connector and the combi cap for a fast installation. This supplementary electric locking mechanism increases the pressing force of high and wide windows through an additional locking point and provides mechanical locking for the window.
